As a frontend engineer with 7+ years of experience, I understand that a user interface is more than a pretty picture. In this age of information, these digital points of contact define how we interact with the world around us. My job is to make these experiences delightful and inviting... and to do it with finesse.

I'm fluent in...

- JavaScript
ES6+ | TypeScript | Vue.js
- markup & styling
CSS3 | Sass | RWD

I'm comfortable with...

- technical writing
- agile & kanban
- unit testing

I especially enjoy...

- kind & curious teammates
- artful code
- tinkering & optimizing

Frontend Engineer

 Telos Blockchain Foundation

 April 2022 - Present

Created a new Ethereum wallet webapp (Telos Web Wallet) while maintaining two existing block explorers.

- fully open source contributions
- integrating components with nuanced, complex data
- defining best practices for code quality, testing, and administration
- styling, design system, and interaction patterns
- EVM smart contract integration
- coordinating with a decentralized & global team

Key tools:

Vue.js 3, Quasar, Sass, ethers.io, Jest, GitHub

Frontend Engineer

 URBN Inc. (Nuuly, Urban Outfitters, Anthropologie)

 September 2018 - February 2022

Built Nuuly from the ground up, contributing to all aspects of *nuuly.com*, including:

- full suite of ecommerce functionalities
- modular UI component library & custom CMS
- mobile-first design system
- theming, advanced styling / animation
- API integration, internal & external
- i18n, accessibility, and other compliance

Key tools:

Vue.js 2/3, TypeScript, Sass, Jest, SSR

Frontend Engineer & UX Designer

 SEI Investments Co.

 June 2016 - September 2018

Helped design and build new web-based features for the gargantuan *SEI Wealth Platform*.

Key tools:

Angular, TypeScript, Jest, Axure, Photoshop

Bachelor of Computer Science

 Temple University

 Class of 2016
